

# Project: Beyond the Binge – Churn Analysis Dashboard

Developed an end-to-end analytics solution using Python, and  
Power BI to identify key churn drivers for a streaming  
platform, resulting in actionable insights to improve user  
retention

---

# Slide 1: Title Slide

- **Main Title:** 360° OTT Platform Performance Analytics
- **Subtitle:** Transforming Subscriber Data into Actionable Business Insights
- **Prepared by:** Mostafa Gamal – Junior Data Analyst
- **Tools Used:** Power BI, Python

# Slide 2: Executive Summary (The Big Picture)

- **Project Goal:** To monitor and optimize the health of a global streaming service across Acquisition, Engagement, and Retention.
- **Core Metrics:**
  - ❑ **Subscribers:** 8,579 Total.
  - ❑ **Monthly Revenue:** € 395.39K.
  - ❑ **Retention Rate:** 85.17% (High Loyalty).
  - ❑ **Churn Rate:** 14.83% (Target for Improvement).

# Slide 3: Marketing & Acquisition Efficiency Slide

- **Key Insight:** PPC is the highest volume channel (1,816 users), but "Referral" and "SEO" provide higher quality conversion stability.
- **Financial Impact:** Total Ad Spend of € 41.92M achieved an average **ROAS of 220.69**.
- **Finding:** Retention-based campaigns yield the highest return on investment (€ 222.31), proving that keeping current users is more profitable than acquiring new ones.

# Slide 4: Content Engagement & Viewer Behavior

- The "Prime Time" Discovery: 45% of total platform traffic happens during Evening hours (Peak at 4.7K users).
- Device Dominance: Smart TV is the primary device for long-form content, while Mobile users prefer quick VOD sessions and the "Download" feature.
- Completion Rate: Average series completion stands at 49.82%, with "Drama" and "Thriller" being the most "sticky" genres.

## Slide 5: Subscriber Segmentation (Bubble Analysis)

- **Methodology:** Correlated "Time on Site" with "Loyalty Points".
- **Segments Identified:**
  - ❑ **Super Users:** High duration (>7 mins) and high loyalty.
  - ❑ **Bouncers:** Users leaving within 2 mins (Target for re-engagement).
  - ❑ **Result:** A clear positive correlation exists—as session duration increases, loyalty growth accelerates exponentially.

# Slide 6: Revenue & Monetization Strategy

- **Revenue Breakdown:** The **Standard Plan** is the "Cash Cow," contributing **34.56%** of total revenue.
- **Regional Performance:** **AMER** leads in revenue (€ 105.92K), followed closely by EMEA and LATAM.
- **ARPU:** Average Revenue Per User stands at **€ 46.09**, providing a benchmark for future pricing strategies.

# Slide 7: Risks & Mitigation (The Matrix)

**Insight:** Identified high-risk segments in the "Monetization & Engagement Risk Matrix."

**Primary Risk:** Mobile users have a higher tendency to churn if they don't use the "Download" feature within the first 30 days.

| Device Preference & Download Behavior |      |      |
|---------------------------------------|------|------|
| primary_device                        | No   | Yes  |
| Console                               | 393  | 169  |
| Desktop                               | 546  | 211  |
| Mobile                                | 1923 | 735  |
| Smart TV                              | 2445 | 1039 |
| Tablet                                | 822  | 296  |
| Total                                 | 6129 | 2450 |

**Action Plan:** Implement push notifications for "Low Engagement" users during the afternoon window to drive them toward the Evening Prime Time.

## Slide 5: Subscriber Segmentation (Bubble Analysis)

- **Revenue Breakdown:** The **Standard Plan** is the "Cash Cow," contributing **34.56%** of total revenue.
- **Regional Performance:** **AMER** leads in revenue (€ 105.92K), followed closely by EMEA and LATAM.
- **ARPU:** Average Revenue Per User stands at **€ 46.09**, providing a benchmark for future pricing strategies.

## Slide 8: Conclusion & Recommendations

- **Summary:** The platform is healthy but needs to shift focus from "Volume Acquisition" to "Value Retention."
- **Top 3 Actions:**
- **Optimize for Smart TV:** Enhance the UI/UX for the most profitable device.
- **Tier Upselling:** Target "Basic Plan" users for "Standard" upgrades using personalized content recommendations.
- **Ad Spend Realignment:** Reallocate 10% of the budget from "Awareness" to "Retention" to maximize ROAS.
